

Ingram Hall Makerspace

Account Creation for Research Usage

For researchers wishing to use Makerspace resources, please follow the instructions below. Please allow at least 2 business days for processing of all forms and submissions.

All agreement forms can be found at: engineering.txstate.edu/makerspace/forms.html

1. Complete the **Research Usage Request**.
2. Visit <https://fom.engineering.txstate.edu>
3. After logging into FOM with your SSO credentials, you should be designated as a supervisor and see “supervisor home” on the left-hand menu. Navigate to this page to edit your research project members.
 - a. Note that you may see a “missing financial account warning”, that will be removed after your form is processed.
 - b. If your supervisor role is not active in FOM within three business days after all parties have completed the Research Usage Request form, please contact IHM to resolve the issue.

4. You will see your requested account number(s) and project name(s) listed you as “Research description name”. It is not recommended to change this description as this is what your students will see when reserving equipment.

Account Number	User Name	Research description name	Account Number Status
AccountNumber	Select or type to search ...	Add User	Upload Course Roster
	Student Name	EX123.001	Active

5. To add users to this account, search individually in the drop-down box and add users one at a time (this only works if students have already created an account).
6. In addition to the users, add yourself to this project. This can be done through either of the previous methods.
- a. Users may be added or deactivated from your FOM account at any time.
